

APPENDIX

TABLE OF CONTENTS

Appendix A – Literature Review

Results of a Literature review for the Loxahatchee River and Estuary.....	A-1
Bibliography.....	A-13
Figure A-1. Changes in cypress tree ring size and quality through time downstream of river mile 9, NW Fork of the Loxahatchee River	
Figure A-2 Changes in cypress tree ring size and quality through time upstream of river mile 9, NW Fork of the Loxahatchee River	
Figure A-3. Salinity Profiles in the NW Fork of the Loxahatchee River and estuary during high tide at different discharge rates	

Appendix B – Historical Aerial Photography Study

Historical vegetation distribution along the NW Fork of the Loxahatchee River.....	B-1
--	-----

Appendix C -Field Vegetation Survey Results for the NW Fork

Figure C-1 Bald cypress and cabbage palm relative abundance for the NW Fork of the Loxahatchee River.....	C-1
Figure C-2 Canopy tress along the NW Fork of the Loxahatchee River.....	C-1
Figure C-3 Red mangrove and Bald cypress abundance along the NW Fork of the Loxahatchee River.....	C-2

Appendix D- Statistical Results

Figure D-1 Statistical analysis of flow/salinity data collected from the Loxahatchee River for water quality station # 63.....	D-1
Figure D-2 Statistical analysis of flow/salinity data collected from the Loxahatchee River for water quality station # 64.....	D-1
Figure D-3 Statistical analysis of flow/salinity data collected from the Loxahatchee River for water quality station # 65.....	D-2
Figure D-4 Statistical analysis of flow/salinity data collected from the Loxahatchee River for water quality station # 66.....	D-2
Figure D-5 Statistical analysis of flow/salinity data collected from the Loxahatchee River for water quality station # 67.....	D-3
Figure D-6. Daily values of flow and salinity for water quality station#63.....	D-3
Figure D-7. Daily values of flow and salinity for water quality station#64.....	D-4
Figure D-8. Daily values of flow and salinity for water quality station#65.....	D-4
Figure D-9. Daily values of flow and salinity for water quality station#66.....	D-5
Figure D-10. Daily values of flow and salinity for water quality station#6.....	D-5

Appendix E – Preliminary Modeling Results

Preliminary Results of Loxahatchee Estuary salinity Model.....	E-1
Tables E-1& E-2 Freshwater input of Simulation # 1	
Figure E-1. Loxahatchee Estuary Model Finite Element Mesh	
Figure E-2. Comparison of model output and field record at WQ Station 64	
Figure E-3. Comparison of model output and field record at WQ Station 65	
Figure E-4. Comparison of model output and field record at WQ Station 66	
Figure E-5. Semi-dirurnal salinity fluctuation at WQ Station 65	
Figure E-6. Tides at Boy Scout Dock, January 1- April 30, 1999	
Figure E-7a. Transition of salinity regime in response to freshwater input change	
Figure E-7b. System response times	
Figure E-8. High Tide Salinity at Station 8a (RM 8.1) Kitching Creek, Simulation #1	
Figure E-9 Low Tide Salinity at Station 8a (RM 8.1) Kitching Creek, Simulation #1	
Figure E-10. High Tide Salinity at Station 8a (RM 8.1), Kitching Creek, Simulation #2	
Figure E-11. Low Tide Salinity at Station 8a (RM 8.1), Kitching Creek, Simulation #2	
Figure E-12. High tide Salinity versus Lainhart Dam discharge at 10 sites located along the NW Fork of the Loxahatchee River.	
Figure E-13. High tide Salinity versus Lainhart Dam discharge at 10 sites located along the NW Fork of the Loxahatchee River.	
Figure E-14. Location of 2 ppt salinity-line position at high tide as a function of discharge from the Lainhart Dam	
Figure E-15. Location of 2 ppt salinity-line position at low tide as a function of discharge from the Lainhart Dam
